

## Weldon

By, Brady Koch

It was a gloomy, foggy day when I boomed into Touchmark and saw Weldon. I needed to interview him, he looked wise and his face blazed like the sun. I need to find out about his main accomplishments and his amazing life story. He had nice thick beard and white hair. Before I tell you more, I have to tell you that Welldon is an amazing man.

Welldon had a pretty normal childhood but it is special to me. Weldon was born on April 22nd, 1932. First, when Welldon was little he had a pug that he loved a lot. He had one brother too. Also he had kind, not too strict parents. But Welldon had to walk to school which felt like 20 miles but it was only 2. Finally, when Welldon got older, he had a dream of a being a dentist.

This is piece of my story is when Welldon was middle aged. He was a hard worker. First, Welldon is a brave man and it showed when he attended the army. In fact, he went on many missions including one to Africa. Then, he attended to college for 3

years. Then he went to dentistry school for 4 years. He also felt like he wanted to be in the mission field, helping others. After this, he was a dentist for a jaw dropping 30 years, that is 3x my age. Now you know Welldon is a very talented man.

His advice is amazing. Welldon's advice for the new generation is( please think about this), "You have to realise what you are worthy of and you cannot stay focused on only one dream because you are worthy of so much more. You are worthy of more than one thing."

You probably think Welldon is brave because she was in the army and smart because of his 30 years of dentistry. But don't forget and his amazing advice. Now that you now know Welldon, you know he is a pretty good guy. He is like a star blazing in the night sky, plus he is so smart. In fact, he could build a rocket ship. Because of meeting Welldon, I feel capable of doing many more things.

PS-Please write to this email to keep in contact.

*Romy*

I was so interested in all the stories she told me. Working on the biggest airline, living in Switzerland and being brave through a death of somebody close in her family. Romy told me to tell the truth; don't be somebody you're not; and don't be greedy. Today, you will learn about an amazing woman's life. You will learn about her childhood, her main accomplishments and her advice for the younger generation.

Romy Danielson was born in Switzerland on April 24, 1934. Romy had one brother named Hans. She and Hans used to do everything together. Romy's favorite thing to do when she was a child was to play hopscotch, hide n seek, and to jump rope. When Romy was a child, her favorite memory was to go out with her class at school on an all day hike. When they went on the hike, they would have lunch and then just keep hiking. Even though Romy did not have a pet she always wanted one. Romy did not play any sports back then because back then they did not really have sports, especially for girls. Romy's mom was a homemade cook and her dad was a butcher.

In Romy's older life, she worked for the biggest airline in the world, Pan American. That airline only flew outside the United States. It flew as far as Bangkok. Romy had two children: one girl named Kristen and one boy named Eric. She also has four grandchildren. Romy's most prized accomplishment is when she came to the United States all by herself at age 23. Sadly, her brother Hans died when he was 20. That was a hard time for Romy because she and her brother were always together and then she suddenly was alone. If Romy could change one part of her life, it would be to study and work harder in school. Romy's favorite hobby now is to read. Romy likes to read all types of books, but her favorite is fiction.

Romy's advice for the younger generation is to tell the truth, don't be greedy and don't try to be somebody you're not. I believe this is really good advice because it will help you focus on the things in life that are really important. I am so glad I got to meet Romy and I will definitely try to follow her good advice!
