Vehicle Eligibility for AACA Sentimental Tour

Because AACA is dedicated to the preservation, restoration and maintenance of automobiles and their history and because the general public witnesses AACA National Tours, authenticity is considered to have a high priority. Therefore, to achieve this purpose, most of the body, engine, chassis and drive line components of all vehicles entered in a National Tour needs to be of the same vintage as when the vehicle was manufactured. Vehicles that are obviously "modified" from the original design present an inappropriate impression on the aim and purpose of the AACA and will not be accepted. The foregoing is not meant to exclude vintage accessories available when the vehicle was manufactured. Any advertisement displayed on a vehicle must be appropriate to the era of vehicle manufacture. Safety is paramount in a tour environment. Vintage performance modifications are acceptable so long as safety is not compromised. Radial tires, original type tires of a different size from original and white sidewalls of a different width than original are acceptable, provided they are mounted on original style wheels. Seat belts are acceptable and recommended. Hydraulic brake modifications are acceptable provided they have been done in an unobtrusive and professional manner. **Every owner must have an AACA approved fire extinguisher in your vehicle.**

Sentimental Tours are for vehicles manufactured for the model years 1928 through 1958. Racing vehicles are not accepted. Vehicle substitutions and eligibility are at the discretion of the Tour Chairman and/or Tour Liaison Director, and their decision is final.

With my signature below, I certify that my vehicle meets the eligibility requirements as stated above. Disclaimer: I agree to release the AACA and the Hornets Nest Region, its officers and representatives from any liability for injuries, damage or loss from attendance at or participation in the 2016 Sentimental Tour.
