Clutter, Hoarding & Chronic Disorganization

9 a.m. - 4 p.m. • 6 C.E. Hours

Do you have at least one too many stacks of "important" papers lying around? Did you inherit a depression-era "save everything" philosophy? Struggling to manage the clutter in your personal and work environment can lead to frustration, stress, and the feeling of being chronically disorganized. For some, the inability to limit, organize, and let go of the "stuff" in their lives can lead to low self-esteem, shame, compromised relationships, and occupational difficulties. This course explores the psychological and environmental factors that lead to clutter, hoarding, and having too much stuff.

Roland Rotz, Ph.D., is a licensed psychologist working with those battling chronic disorganization. He is the co-author *Collaborative Therapy for Clutter Management*.

If so, this course explores the various expert witness roles that mental health professionals can serve in a variety of civil and criminal cases; and includes lots of tips on testifying, examining the evidence, and working with attorneys.

Alyce D. LaViolette, M.S., is a licensed MFT specializing in family violence and partner abuse. She serves as an expert witness and legal consultant on cases involving assault, kidnapping, murder, child custody, domestic violence, and battered women's syndrome.
