

IN THE FAMILY

SCREENING & DISCUSSION TOOL

P.O.V. and Facing Our Risk of Cancer Empowered (FORCE) are proud to offer a **FREE screening of "In the Family"**, a Kartemquin documentary by Joanna Rudnick, a BRCA* positive filmmaker. The film chronicles the stories of families undergoing genetic testing, the decisions they make as a result, and the impact those decisions have on their lives.

Join us after the film for a discussion utilizing the development of a new reflective tool: "Viewing BRCA". This visual tool addresses the thoughts, questions and emotions that are raised by the issues related to BRCA. It is intended to further the reflection in connection to watching "In the Family" with friends or family.

Members of the local FORCE group, (a national organization dedicated to improving the lives of individuals and families affected by hereditary breast and ovarian cancer) and Helena Kjellgren (designer of the tool) will lead this discussion.

This event is a collaboration with P.O.V., PBS' award-winning nonfiction film series. <http://www.pbs.org/pov/> and Kartemquin Films: <http://www.kartemquin.com>.
