

INSOL Europe Annual Congress, Berlin, Germany, 1-4 October 2015 – ‘Harmonisation and Innovation’

€100 discount for TMA members.

Following the very successful Annual Congress in Istanbul in 2014, INSOL Europe can announce that their next Annual Congress will be in Germany’s vibrant capital city – Berlin.

Focus this year will be on two major themes: **Harmonisation and Innovation**. Both are high on the agenda. The EU Commission is conducting a thorough study of the harmonisation of insolvency laws across the Member States. INSOL Europe has taken up the role as torchbearer in drafting and adopting guidelines.

Out in the field we meet many challenges, especially of “modern” businesses with new innovative financial structures, with intangible assets and with heavy reliance on IT in applying the current rules. Against this background INSOL Europe will discuss the benefits and limitations of harmonisation, the challenges in the businesses of today and also provide real life examples of innovative and creative approaches in distressed situations.

An Academic Forum conference will also take place during the Annual Congress, as well as meetings of the Judicial Wing and other working groups.
