

## NOTICE

July 8, 2015

Dear City of Bloomfield Hills Resident:

The City of Bloomfield Hills 2015 Road Improvement Program along Cranbrook Road is scheduled to begin on Monday, July 27, 2015, weather permitting. Construction crews will be on-site providing layout stakes for the contractor, marking utilities, mobilizing traffic control signage, and installing soil erosion control measures. **Please do not remove the stakes as they are needed to properly align construction of the underground utilities and roadway.** Construction is anticipated to be complete by the end of October, with restoration to follow thereafter.

To maintain traffic during construction, one lane of traffic will be closed and the other lane will be a one way road. Northbound traffic will be maintained and you will not be able to go southbound on the road during construction. There will be lane shifts occurring during the construction to the left or right side of the road but you will always be able to travel northbound.

Local traffic on Cranbrook Road will be maintained at all times, but progress may be slow at times as temporary road closures will need to occur for short durations while the Contractor performs the work and mobilizes equipment. Please try and limit your trips during normal working hours and seek alternate routes avoiding the areas under construction whenever possible.

The activities associated with this construction will be disruptive for those of you that access your homes frequently throughout the day. To help minimize this impact on your trips to and from your homes, below is the cellular phone number of the City's field representative from Hubbell, Roth & Clark, Inc. who will be on-site at all times. In a hope to reduce the inconvenience of this construction on your daily routines, if you can call in advance of your trip the Contractor should be able to move his equipment in a timely manner.

The Water Resources Commissioners office of Oakland County may provide answers to issues you may experience with your water. The phone number there is 248-858-4317. This number is for construction issues only. They will not be able to address billing or other concerns.

The City is planning on providing frequent e-mail updates to notify residents about the status and progress of the project to all residents that are interested in participating in this form of communication. The City is requesting that any residents that would like to be informed by e-mail about the status of the project and to be provided with updates, to contact Hubbell, Roth & Clark, Inc. listed below, to be included on an e-mail distribution list. Should you have any concerns or questions, please contact:
