Largest Solar Panel Manufacturer in the U.S. Chooses Oregon City's Sunlight Solar Energy to Install their 250 kW Solar Array

Hillsboro, OR – If you are a Sunlight Solar Energy customer, you most likely have SolarWorld panels on your home. We are proud to announce that SolarWorld shares your confidence in Sunlight Solar Energy and has selected us to install the newest addition to its Hillsboro manufacturing campus; a 250 kilowatt ground-mounted solar array. Two weeks ago, representatives of Sunlight Solar Energy and SolarWorld broke ground on the project at SolarWorld's headquarters for the Americas. This is the third solar array installed on the site, which features electric vehicle charging stations and roof-mounted modules used

for demonstration and training. Both companies have been partners for many years but this installation marks the first direct exchange of services between both companies. Paul Israel, President of Sunlight Solar Energy states: "We're excited to complete this project for our longtime partner, SolarWorld, which is a crown jewel in the solar industry that creates jobs for Oregonians."
