

# Information Session: Changes to the Residential Florida Energy Code

## DID YOU KNOW?...

- Prescriptive Glass to Floor Requirements are changing.
- Are you doing blower door tests? They may be a requirement!
- Are ERV/HRVs in your future?
- New air changes per hour requirements are changing. Is your system being set up for failure?

\*Light refreshments

**Where:** Advanced Technology Center  
1770 Technology Blvd, Daytona Beach, FL

## Presented by: Jeff Sonne

Jeff Sonne is a senior research engineer in the Buildings Research division of the Florida Solar Energy Center (FSEC). Jeff recently headed a statewide Florida Energy Code compliance training project, and has served as principal investigator or co-principal investigator for a number of research projects over his 23 years at FSEC including a residential airtightness and ventilation study, monitored residential air conditioner sizing study and a green roof demonstration project. He has also served on two Florida Building Commission efficiency sub-committees.

## Session will cover:

- Residential Florida Energy Code Overview and 2014 Changes
- Section R402 (Prescriptive) Compliance
- Section R405 (Performance) Compliance
- Code Calculation Software Tools
- Q&A
