

HONOURING UNIVERSAL BEING

THE PHILOSOPHY OF THE EMISSARIES

We honour Universal Being in all its forms and names - through people, through nature and through all creation. We see this attitude of honour for Universal Being as the pivotal factor for the future of humanity.

We especially honour and welcome the expression of Universal Being through ourselves. We believe that this honouring opens us to a full knowing of the wisdom and love within us. It allows us to give our greatest gift to the world and know the greatest fulfilment that is possible for a human being. As we each do that, we become whole and create wholeness around us – we become an emissary of the light of Universal Being. Whole people - whole world.

All of Riverdell Spiritual Centre is dedicated as a teaching and demonstration site for this essential wisdom - both the inner knowing of Universal Being and the practical application of that knowing. This philosophy underpins all our programs, and is our guiding principle when inviting others to offer their programs here. This is why an intentional community was established and why we practise sustainable living and care for our land. Riverdell Spiritual Centre exists to embody this truth and to bring it to our world.

To us, honouring Universal Being is the guiding principle to be embodied in everything we do. If you agree, we welcome you to join with us in bringing this experience to the world.
