Swab4Emilia

Be the Match-Bone Marrow Donor
Registry

April 26, 2015

Emilia is an 11-year-old student at New Cumberland Middle School. Emilia was 9 years old when she was diagnosed with Ewings Sarcoma, a rare type of bone cancer. After a year of chemotherapy, surgery, and radiation she was in remission. Unfortunately 1 month short of her year anniversary of being in remission she was diagnosed with a secondary cancer.

This cancer is a result of the treatment she received for her primary cancer and the only cure is a bone marrow transplant. Please join us in seeing if you could be the match she is waiting for. For more information please visit <http://bit.ly/1Pny0zX>
