COMMUNITY-SUPPORTED AGRICULTURE (CSA) is a partnership between farmers and the community. Members purchase shares in the beginning of the season for a weekly supply of fresh produce. The SIU Student Sustainable Farm is a 6-acre farm developed to provide hands-on education for students interested in small farm management, organic/sustainable farming methods and field research. This CSA will provide funds to help students maintain the farm and gain valuable work experience.

SEASON SHARES
Full: $25/week ($500/season)
Half: $15/week ($300/season)
Student: $10/week ($200/season) with student ID
