

CME 3 YEAR RECERTIFICATION ADMINISTRATIVE MANUAL UPDATED

In March the NYS DOH Bureau of EMS issued a revision to the 3 year CME based recertification Administrative Manual. The CME recertification program is currently a statewide EMS agency based program designed to allow an EMT, Advanced EMT, EMT-Critical Care or Paramedic:

1. Who is in continuous practice,
2. Is able to demonstrate competency in applicable behavioral and performance objectives,
3. Completes appropriate continuing medical education,

to renew their certification without taking a traditional recertification course and the state examinations.
