

## **NYS GRANTS FOR WIND ENERGY INSTALLATIONS**

The New York State Energy Research and Development Authority (NYSERDA) announces the availability of approximately \$13.8 million in incentives to encourage the installation of end-use wind energy systems for residential, commercial, institutional or government use. The incentives, of up to \$100,000 per site/customer, will be paid to Eligible Installers who install new approved grid-connected wind energy systems using qualified equipment, in accordance with the eligibility requirements. An on-site wind energy system is connected on the customer's side of the electric meter and electricity generated by the system offsets the customer's electricity purchases.

**Eligibility:** Installers must demonstrate that they have adequate training and experience installing wind energy systems, including wind turbines and towers, and must be authorized by the wind turbine manufacturer or distributor to be an installer of the Eligible Wind Turbine. Installers must be approved by NYSERDA before they may submit an application on behalf of a customer.

**Funding:** Approximately \$13.8 million

**Deadline:** The program will continue through December 31, 2015 or until funds are fully committed, whichever comes first.
