

WHY HANDICARE?

Handicare has been committed to Safe Patient Handling and Mobility for over 25 years. For the past 5 years, Handicare has invested in unparalleled product and program development with leading technology as evidenced by our current solution offerings. Our focus is to develop strategic relationships with clients, enhancing value to their patient and employee safety program to improve patient outcomes and deliver measurable financial results.

WE GUARANTEE RESULTS!

Through our commitment, knowledge and flawless execution, Handicare has a proven track record for providing clients with a reduction in associate injuries. We have a team of industry-leading experts and local distributors who are deeply vested in the success of your ministries. These local owner operated distributors have the "Whatever It Takes" attitude to deliver the industry-leading service and support you deserve.

WHAT DOES THE FUTURE BRING?

Because of the ever-changing environment and the modifications in Healthcare reform, there is an overall uncertainty in the future. With our innovations, speed to market and commercial flexibility, Handicare will remain strong, fast and nimble. The following pages highlight our core product offering which is developed based on cutting-edge technology, industry demands and innovation.

Handicare Offers A Wide Range of Products and Services, Helping You Achieve Patient and Staff Safety.

We listen to your associates and provide the right tools for their application, we are focused on helping improve output metrics on: Staff Injuries, Patient Falls, Pressure Ulcers and your Survey Preparedness and Safety Standards.
