

IMPORTANT PRODUCT ADVISORY
FMCNA 0.9% 1-liter Sodium Chloride Injection USP
Product Code 060-10109

Dear Customer:

Fresenius Medical Care North America (FMCNA) would like to notify you of a temporary shortage in regards to our 1-liter normal saline product.

Please be advised that, due to high market demand, Fresenius Medical Care 1-liter 0.9% Sodium Chloride saline product (SKU: 060-10109) is in short supply. At present our Ogden UT facility is providing product at full capacity and our Guadalajara MX facility, which normally handles the increased demand, is experiencing issues with Customs creating a temporary shortage.

In light of this situation, and to ensure continued availability of product, we have implemented a new order entry control and are also investigating secondary suppliers. Starting immediately, orders will be limited to one week's worth of product at a time based on historical ordering patterns unique to your business.

We anticipate this being a short-term issue and that we will be able to return to standard ordering procedures within the next few weeks.

We apologize for any inconvenience this action may cause and appreciate your patience and understanding during this time.

For questions about your orders, please contact your FMCNA Customer Service Team Representative at 1-800-323-5188.

Sincerely,

Robert Gregory
Senior Product Manager
FMCNA Renal Therapies Group
