

Community-Based Medical Education: Local, Regional, and Statewide Impact

Julie Phillips MD, Andrea Wendling MD, Brian Mavis PhD and Carrie Fahey BS

Campus/ Community	Specialty Analysis		Geographic Analysis				Total Grads
	Primary Care	High-Need Specialties	Health Professions Shortage Areas**	Rural	Practice within 50 Miles	Practice in Michigan	
Flint	235 (44%)	296 (55%)	230 (46%)	59 (11%)*	124 (23%)	230 (43%)	539
Grand Rapids	327 (39%)*+	437 (52%)*+	392 (52%)*	110 (13%)*	227 (27%)*	383 (45%)	848
Kalamazoo	247 (45%)	327 (59%)	246 (49%)	73 (13%)	83 (15%)*	208 (38%)*	554
Lansing	260 (46%)	354 (63%)*	230 (45%)	92 (16%)	121 (22%)	261 (46%)	562
Saginaw	206 (47%)	258 (59%)	195 (47%)	78 (18%)	53 (12%)*	157 (36%)*	436
Upper Peninsula***	88 (52%)*	109 (65%)*+	81 (57%)*	76 (45%)*+	27 (16%)	89 (53%)*	168
All Campuses	1363 (44%)	1781 (57%)	1374 (49%)	488 (16%)	124 (20%)	1328 (43%)	3107 (93.9%)

* statistically significant difference (p<0.05) when compared to all other campuses

+ remained significant after controlling for demographic variables

** excludes 279 graduates practicing in the zip code of the community's primary MSU-CHM teaching hospital(s) in 2011

*** Marquette defined as the community center, but students disperse across U.P. during clinical work
