Get flood client referrals through FloodSmart.gov

When a consumer uses the Agent Locator tool or completes the One-Step Flood Risk Profile on www.floodsmart.gov, the response includes 3 flood agents in their zip code who could quote their policy. If you register as a FloodSmart agent, one of those referrals could be YOU!

Wright Flood has the resources to provide you with the two hours of flood insurance training you need to be eligible for the Referral Program so you can get the support—and leads—to build your flood business.

To be eligible for the FloodSmart Agent Referral Program, agents must show proof of 2 hours of flood insurance training completed within the last 2 years. While the training does not have to be from the NFIP or eligible for continuing education credits, it must be technical in nature.

Wright Flood's Live Webinars and On-Demand recorded webinars offer trainings approved and accepted by Floodsmart, You can view our available topics and register for the webinars by going to www.wrightflood.com and logging in to the agent portal using your userID and password.

Once you complete participation in your selected Live or On-Demand webinar(s), you will then send a request for proof of completion to floodmarketing@weareflood.com along with the dates you attended or viewed the webinar(s) as well as the topic title(s). Wright Flood will send you a report to upload to your Floodsmart.gov account as required proof of training completed, which will include:

- Your name
- Name of course
- Date you completed the course
- Length of course
