

# STAAR TESTING

## *Important Dates to Remember*

### **March 28 - April 1**

This year, March 28 – APRIL 1 is STAAR testing in all elementary and middle schools. Seedling makes every effort to respect our campus partners by asking that mentors do not visit during STAAR TESTING WEEK, so that the school staff can focus uninterrupted on the important business at hand. This request is for ALL MENTORS, regardless if your mentee is in a testing grade. (During these weeks, lunch schedules sometimes change, and spaces normally available for mentoring are likely to be occupied by small testing groups.)

After the first STAAR testing week, there will be four straight weeks to visit before the next round of testing in early May.

Try to remind your mentee that you will not be visiting the week of STAAR and will return the week after. Thank you so much for your support, and being a STAR in your mentee's life!
