

HO Scale Alco/MLW FA-2 and FPA-2

When it comes to the FA-2 and FPA-2 locomotives, one size definitely does not fit all. There were substantial variations from railroad to railroad, and we're covering all of the major ones. Rapido is the first company ever to offer in ready-to-run form:

- **Correct water/fuel tank combination for the FPA-2**
- **Vertical battery box louvers (as appropriate)**
- **Underbody piping and conduit**
- **Nose louvers for Baltimore & Ohio**
- **Trainphone antenna for Pennsylvania RR**
- **Prototype-specific details for all roadnames**

Ours is also the **ONLY** FA model ever produced that was designed using a 3D scan of the prototype. The nose on our model is the only one guaranteed to be the correct shape, as it's the only one designed from a 3D scan! It is quite different from the nose used on older FA models. They were far off the mark.

Here's a complete rundown of the features:

- Correct details for US and Canadian Phase Ia, Ib and II locos
- Dynamic brakes (later runs will include non-dynamic brake units)
- Operating number boards, headlights and two-color class lights
- Etched-metal grilles (Farr or chicken wire, as appropriate)
- Heavy, die-cast chassis and full underbody detail including piping
- Correct, roadname-specific FA-2 and FPA-2 fuel tanks (four types)
- Separate grab irons and handrails installed at the factory
- Roadname-specific details, including horns, NYC/PRR coupler covers, Erie nose-side grilles, ATS/GRS shoes and winterisation hatches
- Full cab interior
- Sound-equipped with an ESU LokSound decoder or DC Silent
- Accurate sounds recorded from a real Alco 244 prime mover
- 5-pole, skew-wound motor with excellent slow-speed performance
- Factory-installed Macdonald-Cartier couplers mounted at the correct height

Order Deadline May 24th, 2016.
Available first quarter 2017.
