HO Scale Amtrak "Cabbage" NPCU

In the 1990s, Amtrak began a rebuild program to convert F40PH locomotives into Non-Powered Control Units (NPCUs). These NPCUs allow "push-pull" service and eliminate the need to turn a train at terminals. During the conversion the prime mover and traction motors were removed and a large roll-up baggage door was added to the sides. This gave the NPCUs the nickname "Cabbages," for cab-baggage car.

NPCUs are in service today on numerous routes in California, the northwest, the midwest and the northeast.

Our new NPCU model has many accurate features and details including:

- Completely new body
- Operating ditch lights, horn and bell
- Accurate enlarged marker lights
- Supplementary air reservoirs
- K5LA horn
- Smooth running mechanism *

* Unlike the real Cabbage, our model is fully powered.

HO Scale Amtrak Modernized F40PH

Amtrak F40s were updated with the addition of ditch lights and revised cab door steps and windows. Our updated model includes those same features and more:

- Smooth running mechanism
- Modernized body with recessed step wells and new cab door
- Operating, flashing ditch lights
- Operating strobe lights and marker lights
- User-controlled operating number boards
- 100% accurate dimensions
- Etched-metal grilles and windshield wipers
- Unmatched underframe detail
- Full, decorated cab interior
- Accurate Amtrak F40PH sounds
- Revised packaging to protect the horns!

Our first run of Amtrak F40PH locomotives (including 200 extras) sold out in two days!

Reserve your modernized F40PH today to ensure you don't miss them.

HO Scale VIA Rebuilt F40PH-2D

In 2010 VIA Rail Canada rebuilt its F40 locomotive fleet. This involved removal of the HEP (Head End Power) alternator and installation of a separate HEP generator in the rear of the locomotive. At the same time the locomotive was given VIA's green, grey and yellow Renaissance paint scheme. By the end of 2012 all 52 F40PH-2D locomotives had been rebuilt.

Our Rebuilt F40PH-2D features:

- All of the amazing detail found on our original F40PH-2D
- Radiator fans, rads and cabling visible through the HEP grilles
- All-new body with different spotting details
- Operating ditch lights and emergency light
- Accurate sounds recorded from a rebuilt F40PH-2D
- Emergency horn and two types of VIA E-Bell recordings
- Ten different locomotive numbers

Order deadline July 1, 2016.

Models due Late 2016.

In 2013 the Government of Canada issued a new polymer \$10 banknote featuring The Canadian on the verso (back). The locomotive was number 6403 and the VIA logo was replaced by the Canada wordmark.

We're offering a special limited run of the \$10 bill version of 6403, complete with the Canada wordmark. As an added bonus, 50 of the locomotives will have a crisp, uncirculated \$10 bill in a plastic sleeve hidden in the box. One locomotive will include a collection of ten uncirculated \$10 bills in numerical sequence!
