

Mr. Beard is a co-founder of Wellcentive, with experience designing and implementing flagship medical software systems.

Previously, he was a clinical application designer for Patient Care Technologies, a MEDITECH company (one of the oldest software companies in the U.S.), where he developed a rules-based, task-oriented healthcare application for optimizing workflow in the home care setting. This industry-leading product helped MEDITECH retain clients and capture more of its target market.

He designed Wellcentive's software application suite and is currently responsible for R & D, product strategy and future product design.

Mr. Beard earned a B.S. in Occupational Therapy from Concordia University, Wisconsin and an M.A. in Health Studies/Health Promotion from the University of Alabama.

With nearly two decades in healthcare information technology, Mr. Walsh's fortunate career path has allowed him to remain at the forefront of each major healthcare IT trend, at the moment of its emergence in the market. After completing an internship at the Department of Health and Human Services in Washington, DC., Mr. Walsh joined the Life Sciences Division of IBM. He entered the

health IT space when he joined A4 Health Systems where he lead sales of electronic medical records for the southeast region of the country. Through merger and acquisition, he held the same sales leadership role for AllScripts.

Mr. Walsh left sales to lead the strategic initiatives division for Greenway Medical Technologies. In this role, he designed a national consultants program, directed the company's ventures around the impact of ARRA/HITECH Act, and lead project management for the business's HIE and accountable care strategies.

Today, Mr. Walsh runs corporate development and strategic alliances, driving inorganic growth for Wellcentive. A graduate of Auburn University with a B.A. in business and psychology, Mr. Walsh lives north of Atlanta with his wife and two boys.
