

AV-8B-1 Harrier arriving at Carolinas Aviation Museum

Our aircraft, built in 1981, is the third US built Harrier and it was retained by McDonnell Douglas for testing purposes during which it was flown for over 5000 hours of flight tests. It is on loan from the National Museum of Naval Aviation.

Dropping the engine into the fuselage.

Installing the vectoring nozzles.

Wing box ready to install.

Cockpit

Completed Aircraft.

At home in the museum
