## Program

**The Huntington's Disease Center at the University of Pennsylvania** provides individualized, multi-disciplinary, family-centered care to patients with Huntington's Disease. Founded by Dr. Pedro Gonzalez-Alegre in 2014, the Center is rapidly becoming a regional leader in the care of families with HD.

The Center is part of the Penn Medicine Neuroscience Center and is committed to exceptional patient care, professional and community education, social support services, and research.

For additional information about the Huntington's Disease Center at Pennsylvania Hospital, please visit us on the web:
