WOODWAY TREATED POST CAP FINISH

Woodway Treated Post Caps are made of kiln dried Hem-Fir that is machined, assembled and then submerged in an all-natural oil preservative. This treatment, made by Timber-Tek UV, is a penetrating oil-based, water-borne coating that stains, seals and stabilizes the wood. High quality UV inhibitors and mildewicides complete the package of wood protection. Best of all this environmentally safe, all-natural treatment contains none of the toxic substances often found in pressure treated wood products. Technical Specifications and Material Safety Data Sheet are available upon request. For more information on Timber Tek UV finishes go to: www.timbertekuv.com

* All post caps on this page are made to order and require a four carton minimum order per SKU. Standard order minimum requirements may also apply
