

# Cybersecurity Leadership & Strategy Executive Certificate Program

**Leading Against Tomorrow's Cyber Threats**

In this 2-day advanced certificate program, participants will engage academics, industry leaders, and security professionals in assessing the most critical cyber threats facing the public and private sectors in the 21st century. Participants will learn best practices about organizational structures, processes, and legal considerations. Participants will also be exposed to strategies and the most effective approaches to implementing strategies in the workplace. Upon completion of the program, participants will earn an Executive Certificate in Cybersecurity Leadership and Strategy from Florida International University.

### About the Organization of American States

Founded in 1948, the Organization of American States (OAS) brings together the 35 independent countries across the Americas and constitutes the main political, judicial, and social governmental forum in the Hemisphere. Its Inter-American Committee against Terrorism (CICTE) and the Cyber Security Program offer public and private entities in the region technical assistance and training, policy roundtables and crisis management exercises.
