

Got LEGO Fever? We Have the Cure!

LEGO in Motion

Come make vehicles that can travel 50 feet under their own power or glide down a ramp. Use gears to make things move or spin! Students will create race cars, and exciting LEGO® builds with challenges for each one to make them more complex. Students will use LEGO® pieces that move with gears and a motor. Each session the teacher will discuss key engineering and physics concepts and demonstrate how special LEGO® elements work together. You'll take home lots of new ideas and fun memories, but not your LEGO® creations.

Time: 3:15-4:30pm

Grades: 1-3, Lower Elementary

Date: Mondays, March 7th, 14th, 21st, 28th

Location: Mill Falls Charter School

Cost: \$64 for 4-week session

Please return the bottom portion to the front office as soon as possible, as spaces are limited!
