Upgrade to ONYX 12: Simple. Innovative. Proven.

ONYX 12 software delivers accelerated speed and performance, a simplified user interface and new advanced finishing tools to do more in less time. Now is the time to upgrade your current ONYX software to take advantage of these changes for your shop.

64-bit Platform

The power of a next-generation, all 64-bit platform

- *Process more files in less time with RIP speeds that are twice as fast*

- *Take complete advantage of a fully integrated 64-bit platform to setup jobs, move files and open applications quickly*

Application Tools

Automate finishing functions and create new revenue opportunities

- *Bleed tool allows you to produce a variety of new applications, and improve existing workflows, without the need to redesign the original artwork*

- *Create prints with grommet marks that ensure accurate grommet placement and finish-ready prints*

Simplified Production

Save time on every job with new tools and a visual interface

- *Identify jobs and navigate quickly with a new visual user interface that introduces thumbnail previews*

- *In a single window, simultaneously view printer information, nesting previews, and job details*

Quick Sets 2.0

Job templates that streamline and automate routine tasks

- *ONYX Quick Sets 2.0 provides a new user experience with the addition of application tools and a simplified interface*

- *Change Quick Sets for an existing job without the need to re-open it*
