Architects  
Course Number: SC0771  
Units: 1

Leading organizations know that improved employee wellbeing not only helps to be healthier and lowers healthcare costs, it also helps them to be more productive, creative and innovative, and less likely to leave for a competitor. As businesses amp up their focus on wellbeing, many are seeking ways to understand if they are making progress toward their goals, and looking to other organizations for benchmarking, as well as inspiration.

Synthesis of the research done by Steelcase teams identified six dimensions of wellbeing that can be impacted by the design of the physical environment. The foundational concept that links all six dimensions is what Steelcase refers to as an “interconnected workplace,” which offers employees choice and control over where and how they work.

In this presentation, we share new research and insights about the factors that create wellbeing and how workplaces can be intentionally designed to nurture it to drive improved business performance.

**RSVP by 8/24/15**
