

Who is Abraham:

Every month I have new readers join our newsletter list. I was reminded that not everyone is familiar with the Abraham Group that I work with. I apologize for neglecting to share this important information with you.

Abraham is a group consciousness of high vibrational spiritual beings. That is a long title for a group of beings that work for God. Their purpose is to bring humanity the wisdom and guidance of God for the advancement of our soul's journey. They do not function with ego but much of their work is done through human channels. They have chosen multiple people to work through in delivering their messages. Although Abraham works with many channels, their most well known channel is Esther Hicks. She has been channeling their messages and writing books with them for over 30 years.

Their messages can be both individual or global depending on the situation. Each channel gives the same message yet often in a slightly different way due to our personality. You each receive knowledge differently, and often need to hear it multiple times before applying it to your life. The Abraham group focuses on positive intent and empowerment for our lives.

Spirit presented this group to me as my teachers about 11 years ago when my awareness of my spiritual journey began. During this time, they have continually assisted me with my own spiritual development, as well as our work in helping others heal their lives. They have channeled their guidance through the books we have written and the workshops we teach.

They bring us hope and knowledge of the soul's journey through life, into death and the world beyond. You can go to my website www.Lindadrakebooks.com to read more about my journey with Abraham and Spirit.

We all need spiritual support. Whether that support comes through personal interaction with like-minded groups and classes or the stimulation of your mind and heart through the knowledge shared in spiritually based books, it is important to continually nurture your spiritual self.

The spirit within you craves acknowledgment and care taking of its needs for the advancement of your soul's journey. An expanded spiritual experience holds you in the light and love of God, enabling you to give and receive love of both self and others beyond any current limitations.
