

Mast3rPur™

The Next Generation in Water Management Systems Powered by Mast3rPur™

The synergistic blend of three proven natural sanitizers provides water quality and spa care not found in any other spa, including salt systems. Plus, the Mast3rPur Water Management System dramatically reduces harsh chemical consumption like chlorine while removing many heavy metals and chloramines for water that looks crystal clear, smells fresh, and has a silky feel. Another innovative, exclusive benefit only available through Master Spas.

THE POWER OF 3 for Cleaner, Clearer Water

When absorbed in water, ozone kills pathogens and microorganisms, destroys organics, and oxidizes non-organic contaminants

When germicidal UV-C light is exposed to water it inactivates microorganisms and breaks down chloramines

The unique combination of copper and zinc in the patented EcoPur® filters creates an electro-chemical reaction to eliminate most microorganisms and remove heavy metals such as lead and mercury

Each of the three elements are proven effective water management tools but when they are combined, their synergy makes them dramatically more effective through a chemical reaction known as Advanced Oxidation Process (AOP). AOP is superior to other systems because it produces powerful hydroxyl radicals that maximize disinfection and reduces chloramines fast and effectively. Clean, clear, fresh smelling, and better feeling water is available now with less work...exclusively on Master Spas.

Simply Pure...Naturally Pure... Mast3rPur

THE MASTER ADVANTAGE

1. The Mast3rPur Water Management System provides radically clean spa water in an environmentally friendly way
2. Mast3rPur is not corrosive, unlike salt systems
3. Mast3rPur helps to eliminate eye and skin irritation

Clean, clear, fresh smelling, and better feeling water is available now with less work... exclusively on Master Spas
