Innovating is Nothing New!

by Wayne Ulanski, President – Wayne@SVF.net

“If I had asked people what they wanted, they would have said faster horses.” - Henry Ford

At SVF we have made “creative solutions” a common aspect of our business model. The innovations that come from this are realized in the form of products that are used in a wide range of industries and applications.

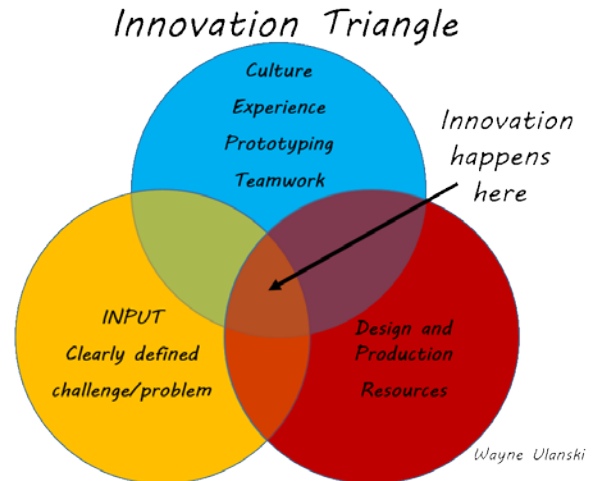

We operate with what we have coined the “Innovation Triangle” and it includes our *Culture*, *Resources* and *Input* from our customer to define and solve specific problems.

Each new design proposal goes through a rigorous process of discussion and dynamic exchanges of ideas that result in a refined problem/solution blueprint for future successes.

After each project we have a **“What did we learn?”** session to continuously improve our workflow.

After more than a decade of creating custom solutions for our clients we are proud to say that we have the ability to quickly turn wishes into realities. With a vast library of products and prototypes we build upon past successes to perform more efficiently in delivering ideal solutions today.

At SVF; *Innovating is nothing new!*

“What do you need today?”™
