

SUMMER 2015

Concepts & Applications using TeCHnology

The CATCH Math Academy is a five-week intensive Math program designed to target incoming 9th graders whose current academic performance in math is no more than two grade levels behind. The Academy will engage students in math concepts and applications through the use of hands-on learning and technology.

Participating students may be invited to return to the CATCH Academy each Summer until they graduate from a SUSD High School. Follow-up summer Academies will embed college and career readiness skills as well as reinforce math foundations for success in high school math.

Students enrolled in the program receive:

- Strategic math instruction to maximize success in high school!
- A college perspective as classes will be on University of the Pacific's amazing campus!
- *FREE use of a chromebook computer to support their learning (to be returned to SUSD upon exit or graduation from SUSD).
- Field trips that reveal everyday mathematics!

Program Dates:

June 15 – July 16, 2015
Monday - Thursday

**Five-week
INTENSIVE
MATH PROGRAM**

**Chromebook
Computer to
Enrolled Students***
