

Mark McCurties is a member of the
Christian Science Board of Lectureship

Making Meaningful Change: How God's love can change your life and the world.

Millions of people are striving to make a change for the better – both for themselves and even for the world. But how can we make sure that such change actually happens? In this Christian Science lecture, speaker Mark McCurties will explain that God's loving and saving power is the greatest agent for change there is, and that through a "right understanding of God, His power can be seen and felt right here and now, bringing health and peace to the world."

The ideas expressed in this lecture are based on the teachings of Christ Jesus as recorded in the Bible and discussed in *Science and Health with Key to the Scriptures*, the Christian Science textbook written by Mary Baker Eddy.

**WHEN: Friday, April 24
at 7:30 p.m.**
