

YOU can help improve healthcare services in western North Carolina

Smoky Mountain LME/MCO is conducting a survey in January 2016 to find out what different types of people think about the state of services for mental illness, substance use disorder and intellectual/developmental disabilities in 23 counties in western North Carolina. The Community Needs Assessment Survey gives participants the opportunity to report any services currently needed in their community, as well as other related topics they feel are important for us to know about.

The 2016 survey will be available from **Monday, January 11**, through **Friday, January 22**. To access the survey online, click the name of the survey that best applies to you or type the website address into your browser.
