12:30 P.M. – 1:45 P.M.

Addressing Complex Factors and Social Determinants To Develop Roadmaps for Survival and to Build Resiliency

Objectives

- Participants will gain a better understanding of social discrimination and cultural issues, social/economic factors, homophobia, stigma, lack of access to health care (increased risk behavior could be barrier to receiving HIV prevention services), behavioral health (mental health and substance abuse), and how these complex factors lead to higher rates of HIV infection.
- Participants will be able to recall the definition of resiliency and explain what role it plays in engaging African American and Latino MSM populations.
- Participants will be able to identify barriers and facilitators to building resiliency in African American and Latino MSM populations.
