Israel Indivisible examines the many political twists and turns that make Israel the world's most controversial nation. From Abram and the Promise, to the fall of the Ottoman Empire, the film examines the historical, archeological, legal and biblical evidence for the ancient and modern state of Israel. At the center of all this history is a group of people who are arguably the world's most persecuted.

The story of the many is tied together in the story of the one and that one is Israel.

Join PJTN as it takes you on a historical journey to uncover the truth surrounding the controversial issue that is rooted in God's eternal Covenant with Israel.
