

Veenod Kurup
Vice President of Product Technology
Cox Communications, Inc.

Veenod Kurup is Vice President of Product Technology for Cox Communications Inc. Mr. Kurup oversees the development and implementation of Technology solutions (IT and Engineering) across all of Cox lines of business including Video (Cable), High-Speed Internet, Telephony, and Commercial Business. In addition to developing and advancing the capabilities in each line of business, Mr. Kurup and his team is responsible for leveraging our technology platforms and processes to deliver services convergence across Cox's product lines. Mr. Kurup reports to the EVP and CTO of Cox Communications.

Kurup joined Cox in 1997 as a Manager of Information Technology to work on developing and deploying Cox's Workforce Administration (WFA) solution. Prior to joining Cox, he served in several capacities including Software Development Manager and Software Engineer for Arrowsmith Technologies Inc. in Austin, Texas.

A graduate of the University of Texas at Austin, Kurup holds a bachelor's degree in computer science.

Mr. Kurup sits on the board of the Messaging Anti-Abuse Working Group (MAAWG), Co-Chairs the TMForum's Cable Initiative, and is a member of the Internet Society (ISOC), and IPDR.Org.
