

EV Week 2015

Let's Go California!

Bakersfield • Monterey • San Rafael

October 4 - 9, 2015

Highlights include:

**Electric Vehicle Exhibits • Ride and Drives
EV Charging Solutions • Press and VIP events**

In its fourth year, EV Week 2015 will expand statewide with its **Let's Go California** campaign. We want drivers across the state to learn about and experience electric vehicles, to *charge across town* and on longer trips using the large EV charging infrastructure being built in California.

Our objective is to:

- Educate and excite people about driving an EV by addressing one of the biggest perceived hurdles in EV adoption – how far can I go in my EV?
- Demonstrate the many EV charging options and networks, and collaborative partnerships across the industry to bring EV to all communities in California.
- Showcase the newest vehicles and electric scooters providing longer range electric, performance, and reliability.
