Volunteer and Learning Opportunity

Come down to the SOU Center for Sustainability and get your hands in the dirt! The Center for Sustainability is an organic sustainable farm that provides work, volunteer, and leadership opportunities for SOU students and the community. Spend a few hours with our students and learn from each other. Discover what it means to be a sustainable farm while helping to start seeds, plant seedlings, prepare beds, remove weeds, and help with a variety of other hands on activities. Come share any farm and gardening experience you have or with a willingness to learn something new.

About the SOU Center for Sustainability

Our Vision

The SOU Center for Sustainability serves Southern Oregon as an independent hub of innovative sustainability training, leadership, and technology. Through community and industry partners, the Center adds beauty to the SOU campus as a place of art, resilience, thoughtful activity, and transformation. SOU students, faculty, and staff work collectively with community leaders, children, families, businesses, neighbors, leaders, and government to train sustainability leaders through hands-on authentic solution development. The Center encourages service learning by providing a place for community-based problem solving, civic agriculture designed to alleviate food insecurity, and explicit focus on synergistic partnerships.

The Center for Sustainability is located at 155 Walker Ave across from Ashland Middle School. Nearby parking available at Ashland Middle School. Indoor restroom facility on site. Come in work clothes and shoes. Bring sun screen, a hat, and a water bottle.
