

Tea Brewing Tips

ICED TEA

Brew a double strength concentrate using 2 tsp. of whole leaf tea per 5 ½ oz cup of water.

Steep black or herb teas for 3 – 5 minutes. Steep green teas for only 1 – 3 minutes.

Dilute tea extract to taste with an equal amount (or more) of room temperature water.

Avoid quick changes from hot to cold to prevent the iced tea from clouding.

Refrigerate any remaining tea and use within 24 hours.
