Call for Applications

Post-Doctoral Fellowship

The I-core Research Center for the Study of Mass Trauma conducts collaborative, multi-disciplinary long-term studies of mass trauma through a global network of leading researchers in different fields, including social work, epidemiology, public health and crisis management, psychology, psychiatry, neurobiology, and molecular neurobiology. The Center aims to promote and disseminate studies relating to markers of risk and resilience in the face of mass trauma, and to the multifaceted effects of mass trauma in the general Israeli population, as well as among high-risk populations. The Center trains and educates new generations of students and professionals from Israel and worldwide, including Israeli researchers returning from academic positions abroad, for in-depth multidisciplinary trauma research and interventions.

The center invites a candidate with a research background relevant to trauma research (e.g., psychology, social work, social sciences, public health) to apply for a post-doctoral fellowship for the academic year of 2014-2015 and actively participate in our research study on the effects of traumatic stress on couples and families. The candidate must possess a doctoral degree, or an approval that his dissertation has been submitted, from a research university in Israel or abroad.

Required documents for application:
- An approval of a doctoral degree or approval of dissertation submission.
- Abstract of the dissertation.
- Curriculum Vitae including list of publications.

Applications should be submitted by email to: Prof. Rachel Dekel: rachel.dekel@biu.ac.il
