The NIDA T32 pre- and post-doctoral Research Training Program in Drug Abuse Epidemiology, Services and Prevention (DEASP) provides outstanding training for fellows in a range of sub-specialties including epidemiology, biostatistics, psychiatric and behavioral health comorbidity, and community implementation science, concerning public health aspects of addiction and addictive behaviors. The Department of Psychiatry also offers biomedical science mentoring in areas of genetics, basic and cognitive neuroscience, psychophysiology, and imaging for those public health researchers who wish to integrate biomedical research tools with their research specialty. The focus of and training in the program includes public health aspects of addiction and addictive behaviors, integration of biomarkers in epidemiology, prevention and intervention studies with high risk populations, an apprenticeship model in a mentor’s research lab, manuscript writing, grant writing, and didactic teaching through courses in the Psychiatric and Behavioral Health Sciences Concentration of the Master of Population Health Sciences program (MPHS). To learn more about the MPHS degree program, please visit the MPHS website at: http://www.mphs.wustl.edu/.

FELLOW SELECTION CRITERIA consist of research goals consistent with the program foci, relevant prior research experience, prior publication record, commitment to an independent research career or other professional public health career, and excellent writing and communication skills. Applicants must be a US citizen or hold a permanent residency visa.

TO APPLY: The full application includes a fellowship application form, curriculum vitae, one page future research plan, two letters of reference, writing sample, and educational transcripts. Informal pre-application inquiries are very welcome. Scientific inquiries can be sent to Rumi Kato Price, PhD, MPE (email: pricer@psychiatry.wustl.edu) or Arpana Agrawal, PhD (email: agrawala@psychiatry.wustl.edu). Logistical and administrative questions can be addressed to Greg Widner. A complete application should be forwarded to Mr. Widner (email: widnerg@psychiatry.wustl.edu; voice 314-286-2223). The application deadline for the current opening is December 15, 2013.
