

The Oklahoma Tobacco Research Center (OTRC) of the Stephenson Cancer Center at the University of Oklahoma Health Sciences Center in Oklahoma City is recruiting post-doctoral fellows (1-3 year appointments) who aspire to become independent academic researchers. We invite applications for six positions with an emphasis on tobacco use and cessation, cancer prevention, tobacco regulatory science, affective neuroscience, and health disparities research.

Training is individualized and fellows will develop competencies specific to their area of research (e.g., ecological momentary assessment, smartphone interventions, fMRI). In addition, fellows will take part in the formal OTRC training program which includes both coursework and seminars that will provide training in grant writing and preparation, conducting community-based participatory research, clinical trials, tobacco-related research methods, advanced statistical techniques, and tobacco biomarkers.

Fellows will be involved in manuscript preparation using data from ongoing studies and recently completed studies. Fellows will serve on research and clinical project teams, implement research protocols, and oversee quality control and data management procedures in addition to developing collaborative projects to further their own research interests.

Qualifications include a doctoral degree in the behavioral sciences, public health, psychology, or other relevant area. Excellent writing skills required. Experience with diverse populations, tobacco research, health disparities, and quantitative methods are preferred but not required. Salary and benefits are exceptional!!! In addition, fellows will have access to funds to conduct research, and attend external trainings and conferences.

The following faculty have open postdoctoral fellow positions: Drs. Jennifer Vidrine, Damon Vidrine, Theodore Wagener, Francesco Versace, Darla Kendzor, and Michael Businelle. Interested candidates should send a curriculum vitae and cover letter stating your research interests, career goals, and faculty mentor with whom you are interested in working with to Leslie Dady (Leslie-Dady@ouhsc.edu).

Oklahoma City is the anchor of a rapidly growing, multicultural metropolitan area with a population of 1.3 million, over 300 days of sunshine annually, very affordable cost of living, excellent schools and a wide array of cultural amenities.

Be a part of a city on the rise: Oklahoma City.
