

Matol/Km[®] & the pH Factor

matol[®]
Botanical International Ltd

The importance of the body's pH balance to overall health is being recognized by an increasing number of health professionals from both the traditional and alternative medical world.

What is pH?

pH stands for Potential Hydrogen. It is a measuring scale that goes from 0 to 14 or from acid to alkaline. You can easily measure your pH with litmus paper using your saliva or urine. Litmus paper is sold in all major pharmacies, drugstores and health food stores.

The premise for good general health is that excess acid in the body underlies all diseases, and consequently that the entire metabolic process

depends, to a large degree, on an alkaline environment.

When your pH is below 7, it indicates greater acidity. When it's 7 and over, it indicates greater alkalinity. The body functions at its best, when the pH of its internal biochemical environment is at 7 or higher.

The pH Process

The purpose of the pH reading is to make sure we eliminate excess acid. Excess acid is acid waste which creates poisonous toxicity. Karl Jurak, who formulated our Matol/Km[®], always stated the importance of flushing toxins from your system as they create an acidic condition where bacteria, fungi and viruses thrive.

Bacteria and viruses thrive in acidity. They also flourish in low oxygen levels that come with acidity. Therefore, by optimizing our alkaline position, we fight the aging process.

The aging process begins in the blood and the best defense against a build up of acid waste is a pH level of 7 or higher, which gives you an alkaline pH. When your pH is alkaline, your blood assimilates the nutrients you need to feed your cells.

When your pH is acidic, you create chaos in your

metabolism and in the process you exhaust the glands and organs that good health depends on. For example, our heart, liver, pancreas, kidneys, colon and adrenal glands all depend on a good alkaline condition.

The heart for one, is one the most alkaline dependent organs in the body.

The heart pumps about 520 quarts of blood an hour or about 13,000 quarts a day. If the blood is not toxin free, it puts tremendous strain upon the heart.

It's time for all of us to reclaim our health. More and more renowned scientists and medical researchers are showing us the way.

If you really care about someone then it's up to you to show them the way, today!

Matol/Km[®] & the pH Factor

matol[®]
Botanical International Ltd.

The importance of the body's pH balance to overall health is being recognized by an increasing number of health professionals from both the traditional and alternative medical world.

Matol may have discovered the true key to long life and health. Bold words for sure, but we may be on the threshold of a new biology based on a simple approach called the Alkaline pH Factor. This is a gift to mankind and the beginning of the realization that blood is the "source of life" in the famous words of Karl Jurak.

Matol's mission to Impact World Health one day at a time, one person at a time, begins with our flagship product Matol/Km[®]. Since 1922, Matol/Km[®] has always been offered as a natural, whole body tonic made of medicinal plants and minerals. It has always focused on the health condition at the cellular level.

The aging process begins in the blood and the best defense against a build up of acid waste is a pH level of 7 or higher at the cellular level, which gives

you an alkaline pH. When your pH is alkaline, your blood assimilates the nutrients you need to feed your cells most effectively.

The purpose of Matol/Km[®] has always been to help cleanse the acid waste or toxins from your body. As it turns out, Matol/Km[®] may be the most potent "Acid Protector" or "Alkaline Booster." It is said that in today's fast paced society, it is easy to forget about the importance of our health. Most of us start out with vibrant health, but by age 30, some begin to develop minor irritations. These small health problems become more serious with time causing our health to fall into decline.

Supplements like Matol/Km[®] can be powerful allies in our quest to reach out to as many people as possible and to bring about our message of good health.

It's time to bring new focus to our Matol/Km[®] and the crucial importance of achieving an alkaline level in your body.

It's time for Matol to lead the way!
