Mini Transat Sailor

THE RUNNERS

LOWRI MORGAN

BAFTA winning
Broadcaster and
Adventurer

JOANNA JACKSON

Indian Ocean Rower
MDS runner and
Ironman

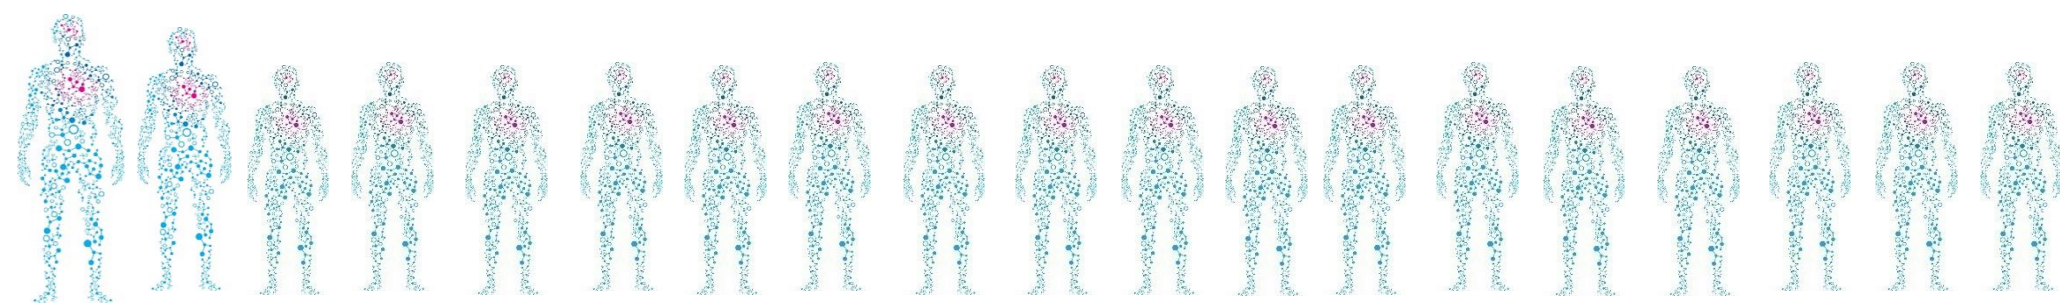

THE CHARITY

Findacure is creating a patient movement to promote the research and development of treatments and cures for fundamental diseases. Fundamental diseases are a collection of rare disease that struggle to gain awareness of their plight, suffer from lack of research and drug development, and are often without funding to pay for treatment. **Findacure** supports them by:

Empowering patient groups to evolve into effective campaigners for change

Facilitating patient groups to drive the development of treatments

Campaigning for a receptive research environment

THE SPONSOR

Founder Dr Elin Haf Davies created **aparito** to address the ever changing needs of healthcare and the increasing challenges of bringing innovative and promising drugs to patients.

By combining disease specific mobile apps and wearable technology **aparito** puts the patient at the heart of monitoring.

The app and wearable generates real-time and real-world passive monitoring, reducing the need for repetitive tests and providing more clinically meaningful data about the patients' well being and health outcomes.
