12:00 noon Symposium Adjourns

WASHINGTON STATE SOCIETY FOR HEALTHCARE ENGINEERING

Semiannual Symposium April 22 - April 24, 2015

"Code Red: Maintaining Life Safety Compliance"

Campbell's Resort
Chelan, Washington

Welcome and Introduction
Eric Rodgers, 2015 WSSHE State President
Providence Health Care Stevens County
Colville, Washington

The Life Safety Code: How We Got Here
Duane Van Beek
Duane Van Beek & Associates LLC
Pasco, Washington

Duane will present the History of the Life Safety Code and how it has evolved to today's code. He will discuss the philosophy of the code development and how it has changed over the years and where we are today. This presentation will provide insight into the importance of compliance with the code and the price paid for its development.

Fundamentals of Accreditation – Part 1 & Part 2
York Chan, CHFM, CHC, SASHE
Administrator of Facilities
Advocate Health Care
Downers Grove, Illinois

Part 1 - Fundamentals of Accreditation. Why hospitals need to be accredited? Review of the survey and scoring process. What needs to be documented? How to do a risk assessment? Overview of the six areas of the Environment of Care. Construction and ILSM requirements.

Part 2 - Review the top ten Joint Commission findings in the Environment of Care and Life Safety in 2014.

Fire, Life Safety & Accessibility Codes for Doors and Hardware in Healthcare Facilities
Jeffery Carlile
Allegion
Seattle, Washington

Jeff will provide a guide for NFPA 80, NFPA 101, ADA, and Access Control Integration.

Lessons Learned: Hospital Construction Standards
Stephen Pennington, CPE
DOH Construction Review Services
Olympia, Washington

Steve will discuss what we have learned and the changes that have been made to make healthcare facilities safer for the staff and patients.

Life Safety Maintenance – Alternative Strategies to OEM Standards “Using Risk Assessment to Support a Maintenance Program”
Les Clawson, Systems Analyst
The Children's Hospital
Centennial, Colorado

Les's presentation will demonstrate how Risk Assessments can be used in the healthcare maintenance environment to help determine equipment and system potential risks and maximize the value and effectiveness of scheduled maintenance activity. Presentation includes a detailed review of a Risk Assessment tool designed to document the evaluation of potential environmental risks and the assessment of scheduled maintenance needs.

Case Studies from WSSHE Members on Life Safety Maintenance Alternative Strategies to OEM Standards

Geoff W. Glass, P.E.
Director of Facilities Management
Providence Health & Services
Southwest Washington

Kevin Kajita
Director of Plant Services
Grays Harbor Community Hospital
Aberdeen, Washington

Greg R. Palmanteer
Director of Facility Services
Valley Hospital, Rockwood Health Systems
Spokane, Washington

A three - person panel will share their real world experiences with an emphasis on ideas for improvement that you can “take back home.”
