Phone (509) 928-6585
Fax (509) 536-3872
Scott Cell (509) 290-3087

Why You Need the Training Program for Pool/Spa Operators

The rapid advances in know-how and technology of pool operation require constant honing of skills. With upward of 4-million pools of all types now in virtually daily use by millions of people, the need for qualified operators is greater than ever. And the need will continue to grow. Anyone supervising the operation of any kind of pool has a life- and health-guarding responsibility. The operator must keep the facility in good operational order and operate it efficiently, effectively and economically. Only an individual with suitable training is qualified to meet such responsibilities.

NOTE: In Spokane County, properties with a CPO on-site receive up to a 25% reduction in their annual permit fee.

The Textbook and Curriculum

The Pool/Spa Operators Handbook will be a valuable resource and reference for the CPO who is responsible for a broad spectrum of services. This handbook as well as classroom handouts are an invaluable resource. The course includes chemistry, water testing, filtration, recirculation, equipment, preventive maintenance, restoration, management, energy conservation, regulations and calculations.

National CPO® Certification

The National Swimming Pool Foundation Certification Award is a permanent registration. The NSPF CPO® is the seal of approval assuring pool and spa owners of quality operation from motel to Olympic and Aquatic Centers of the USA. A CPO® Examination will be given upon course completion. The graduate will receive a National CPO® Certificate suitable for framing.

CPO REGISTRATION
