### **Construction on Neighborhood Hospital Begins**

LAS VEGAS – SR Construction is pleased to announce the start of construction of the Emerus Blue Diamond campus. Dignity Health and Emerus joined together to bring four new neighborhood hospitals to the Las Vegas valley and have partnered with SR Construction as the builder for two of the projects.

The Emerus Blue Diamond campus is a two-story, 27,700 square foot building and is located at 4855 Blue Diamond Road.

This is the second of four planned projects that have launched the construction phase. SR began construction on the first hospital, the Emerus Camino Campus, in North Las Vegas in February of this year. The Camino campus is a three-story, 58,600 square foot building and is located at 1550 W. Craig Road.

“We’re very happy to be partnering with Emerus to build these neighborhood microhospitals,” said Bret Loughridge, vice president of operations at SR Construction. “With an ever expanding population, these new campuses will help provide quality healthcare to the people of southern Nevada in a state-of-the art facility.”

To see updated progress on the two Emerus campuses and SR’s other projects, visit SR Construction’s [YouTube page](#).

###

SR Construction, Inc. was founded in 1991 by Owner Scott Loughridge as a full service Design/Build General Contractor. During our 25 year history, SR has completed in excess of 1000 projects throughout the Southwest to include the healthcare, commercial and hospitality markets of which we have received numerous awards by various local and national organizations.
