

Planters' Choice Basic 4 Step Lawn Program

Step 1... Crabgrass Pre-emergent with fertilizer

Apply late March thru about end of April

- Team Pro w/ 22-0-6 fertilizer 12,500 sq ft
- Dimension w/ 18-0-5 fertilizer 10,600 sq ft
- Barricade w/ 16-0-8 fertilizer 12,500 sq ft

Note: Dimension can be used for EARLY post-emergent crabgrass control into May (higher rates)

Step 2... Broadleaf weed control (Non grass weeds)

Apply mid May thru early July

- Lockup w/ 19-0-6 fertilizer 12,500 sq ft
- Trimec with out fertilizer 10,000 sq ft
- Confront plus Dimension with 19-0-6 fertilizer 12,500 ft² ft
(Can also be applied to new seeding 2 weeks after germination is first noticed for Rye and Bluegrass. See label directions)

Step 3... Grub control,

Apply June thru July to kill grubs that hatch from eggs in fall

- Merit w/ 0-0-7 (will not promote turf growth)
- Merit w/ 10-6-4 or 20-0-5 fertilizer

Step 4... Fertilizer

Apply September thru early November

- 20-0-5 10,000 sq ft
- 10-20-15 8,000 sq ft
- 12-25-12 10,000 sq ft
- 9-2-5 w/ 6% iron for the best green color

Note: Phosphorous should only be applied when soil test shows the need for it or when new seed is being planted.
