

Meet Our Parent Partner Project Staff

"I am very excited to be part of this innovative collaboration between P2P and the Department of Public Health! My team members are able to provide one-on-one assistance to families on site as part of their medical appointment." ~ Susan Brown

"I am amazed and inspired by the people I get to meet. I consider it an honor to help children with disabilities and their parents in any way I can." ~ Amy DeLoach

"I like to work with diverse families from urban, suburban and rural areas across the state of Georgia. I also enjoy being able to provide culturally competent care and language access to Latino, Spanish-speaking families and collaboratively work in tandem with the medical interpreters on site." ~ Brenda Liz Munoz

"What I like the most about being a Parent Partner is sending information that meets 100% of the parent's needs. It makes me happy to share resources with them." ~ Christelle Nnandu

"The children we serve, who have chronic illnesses and/or disabilities/special healthcare needs, have immediate access to timely, important information regarding their health and educational needs. I think the Parent Partner Program is a vital program in Georgia!! I love my job!!" ~ Sue Rowland

"With so many services centered around the individual's disability, the daily living concerns of the caretakers sometimes get overlooked. I love being the resource that lets families know that there is concern for their well-being outside of clinic, office and hospital visits." ~ Suzettra Staples
